

MEMO

The most difficult part of this assignment was the first problem in which we had to read a paragraph about a system and develop class diagrams for it. It was hard for me to decipher which nouns deserved to be full on classes as opposed to attributes to a class and so forth. The semantic relationships were a little tricky too.

Status: Complete

Lines of Code: 36

-ImprovedRandom: 16

-ImprovedStringTokenizer: 20

Lines of Unit Test Code: 14

Unit Test Coverage: 100%

Cyclomatic Complexity: 0
